## Provide identity and vital reflective safety within a tight budget

Eclipse Emergency Responders Reflective Graphic Transfers gives you and your agency the distinction it needs at the critical moment. Now everyone can be identified at busy scenes, even at night, reducing confusion and increasing safety. Eclipse stands out very brightly to drivers of vehicles at night, giving the wearer a markedly reduced threat of collision in low light situations. Glass-bead retroreflective technology used in Eclipse transfers reflects light back to the source which can be seen distances up to hundreds of yards away. Eclipse provides up to 500 candlepower (typical  $R_{10}$ ), 20 times more powerful than screen-printed reflective ink.

### Customizable with Logos and Colors

Safe Reflections can create customized Eclipse transfers in almost any logo or image! Having the city or department logo in reflective on sweatshirts, t-shirts, and jackets provides not only a major safety advantage, but also shows pride, professionalism and cohesiveness for emergency response teams. Even non-reflective color can also be integrated with and around the Eclipse reflective graphics for the ultimate in design and safety. Contact us for more information and pricing.

- Eclipse Reflective Graphic Transfers are perfect for application on sweatshirts, t-shirts, most safety vests, jackets, and even most coats
- Built with the quality you expect from Safe Reflections
- Use exclusively or with ANSI/ISEA 107-1999 compliant garments to increase the overall visibility
- Fire Resistant Certified
- Remains flexible and soft for comfort and easy movement
- Incorporates 3M™ Scotchlite™ Reflective Material
- Heat-applied to most fabric substrates. Heat press must allow for specific pressure and temperature. We recommend Hix machines. Safe Reflections provides professional lamination services for an additional charge
